

WARRANTY

This product has a guarantee against all manufacturing faults for a period of twelve months. This can be extended by completing an online registration at www.kildwick.com/store (see Warranty side tab). Warranty work is on 'back to base' arrangement - returns to Kildwick by customer.

12 Months**Cover**

- All parts against functional faults or faults to the finish of the surface lining of the base or separator

Exclusions

- Separator strainer - this is a consumable item and has a use-dependent life. A spare is provided and is easily replaced.
- Any fault/failure due to misuse, damage or lack of care

36 Months**Cover**

- All parts against functional faults or faults to the finish of the surface lining of the base or separator

Exclusions

- Separator strainer - this is a consumable item and has a use-dependent life. A spare is provided and is easily replaced.
- Any fault/failure due to misuse or incorrect cleaning
- Seat staining - spare seats can be purchased from kildwick.com

WARRANTY REFURBISHMENT SERVICE

Kildwick offer a unique service where, at any time, our products can be returned to our factory for a complete refurbishment - replacing parts, refinishing (where possible) and updating the spec. The price for this depends on model type and age at that time. Once refurbished we agree to extend the warranty for a further period.

SAFETY**FAN SUPPLY (If Fitted)**

The fans are long-life DC fans. When installing please ensure:

- You use a DC supply specified in the model (12V/24V/Other)
- You fuse the positive DC supply line. (max 1A)
- You observe the polarity on the connections (Red:Positive)

WASTE HANDLING

When handling the liquid and solid waste please take handling precautions to avoid contamination of you and your environment.

- Use disposable gloves when performing any emptying/management activity of the waste
- Use the provided lids when moving the containers to prevent any spillage or other contamination
- The white (or gel-covered glitters) surfaces, bottle and bucket are made with an anti-bacterial material. The surface helps to kill bacterial on contact over a 24 hour period so ensure you fully wipe down any solid/liquid spillage with water/eco-cleaner and let the surface deal with the rest.

DISPOSAL OF 'WASTE'

Please be responsible with the product from your compost-collecting toilet and dispose of in a humane compost bin or approved waste disposal container. If you are 'binning' the waste, please use bags designed and printed for the task to help any refuse company identify the contents and handle them appropriately. Rolls of printed compostable bags are available from kildwick.com/store.
